

We have other alternatives to the 35 / 40 cu-yd RoRo available to suit your jobs, including:

14yd³ ENCLOSED CHAINLIFT

20yd³ RO-RO OPEN TOP, LOW SIDED

	14 yd ³	20 yd ³	35/40 yd ³
H	6ft / 1.82m	Bed: 4.6ft / 1.4m Top: 6.5ft / 2m	7ft / 2.1m
W	6ft / 1.82m	8.2ft / 2.4m	8.2ft / 2.4m
L	12ft / 3.65m	20ft / 6m	20ft / 6m

20yd³ SKIP SACK

The Skip Sack is an easier and more professional solution for loose wastes that require the skip to be sheeted out with polythene. The Skip Sack is designed to fit within our 20yd³ low-sided RoRos. The Skip Sack is ideal for loose, *non-fibrous* wastes, such as contaminated soil, that can be mechanically loaded into the skip.

The Skip Sack is double skinned, with an inner polythene bag inside the tough outer sack. Simply unpack the Skip Sack inside the bed of the skip, and tie the ropes to the anchor points. The Skip Sack has the official asbestos signage that can be hung over the outside of the skip if needed.

Once filled, the inner bag can be tied shut, and the outer sack has a lid that covers across the entire top of the unit and is tied up. The waste inside is now safely contained for transport to landfill.

The Skip Sack is fully accredited for use with non-fibrous materials. For more information, please contact Ian.
